# Revision

Revision helps to show the current version of AVEVA or Indusoft that you are running.

If you make an update, it will increase.

Need to have _CML_Revision table.

When you run the app, make sure on your table that you put the Current_[Project#]

The db needs to be set:

Project Explorer

In the database you need to have the current version so the app loads with no issues

Update Manager

1. All the HMIs need to be logged in and running. Go to Program Files x86 -> AVEVA -> AVEVA EDGE -> Bin -> drag runStartUp.exe don't let go.
   - Press alt key and let go
   - It will create a shortcut
   - Pin to star and pin to task menu

2. File Sharing for the C Drive for everyone on isw_Share and iws_BAK
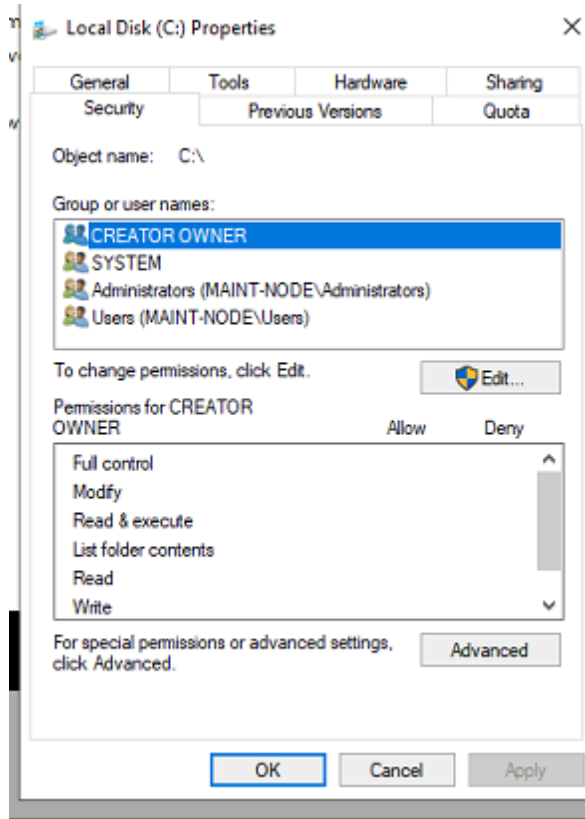

Go to security -> add everyone and give them full access.
In sharing go to advance sharing and make sure he has full access.

3. Make sure to right-click on the C drive, select Network and Sharing, and select All Network. Then, turn off password protection on all the HMIs.

All computers must have the same password for admin and password.
